Education

Clark University, Worcester, MA | Graduated: 06/2025 09/2019 - 06/2025
Bachelor of Arts, Computer Science | Minor in Interactive Studies

Projects

Game Developer for "Unsent" | Unreal, C++, Plastic SCM 12/2024 - 10/2025

- Worked at Red Rabbit Games as part of a core team of 5. Primarily did programming, but also fulfilled roles in writing, game design, and UI. Project launched on Steam October 2025.
- Implemented gameplay elements, design tools, and in-game UI using Blueprints and C++. Resolved FPS bottlenecks with Unreal Insights and Render Doc. Built Save System with an open source library, Steve's Persistent Unreal Data (SPUD).
- Wrote and revised dialogue for NPCs. Created in-game cutscenes using Unreal Cinematics. Collaborated with other members on direction of major story beats, and collaborated on establishing the setting of the game. Collaborated on creating the "combo-based" platforming moveset and design. Resolved technical issues team members were experiencing.

Game Developer for "Reel Tiny" | Unity, C#, Plastic SCM 11/2025 - 5/2026

- Continued with Red Rabbit Games as part of a core team of 5. Primarily did programming, but also fulfilled roles in writing, game design, UI, and task management. Project set to launch on Steam Q3 2026.
- Implemented gameplay elements, design tools, and UI using C#, UI Toolkit, and Unity's new Input system. Resolved FPS bottlenecks using Unity Profiler and Render Doc. Built a dialogue system using an open source library, Yarn Spinner. Handled Steam Integration with achievements.
- Responsible for creating and designing all major UI elements in the game. Held game design meetings and established development strategy. Created cutscenes using Unity Timeline and Cinemachine. Collaborated on audio direction with the audio team. Spearheaded efforts for establishing setting and character profiles. Wrote and revised dialogue for characters. Resolved technical issues team members were experiencing.

Technical Skills

-
- Game Engines: Unity, Unreal
 - Programming Languages: C#, C, C++, Java, Kotlin, Javascript, Python
 - Technologies: Git, Render Doc, Plastic SCM, Perforce P4, Android Studio

Other
